Brighter and More Attractive than Coleus.

A most wonderful plant, surpassing the finest Coleus or Begonia in the rich color of the leaves, which are beautifully marked with bright green color margined with a wide irregular band of lemon yellow and having wide yellow bars running lengthwise of the leaf, and also thickly dotted with yellow blotches. Its most important feature is its wonderful qualification for bedding, as it will stand bedding out like a Coleus; in fact, in the sunniest place it produces the highest coloring.

COMET PLANT. (*Acalpha Sanderii*). COMPACT SWORD FERN. (*Nephrolepis Cordata Compacta*.) Fitting companion for the Boston; dwarfer, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant.

THE BOSTON FERN. For hanging baskets or single specimens in pots or baskets it is superb. We know of no other plant that withstands ill treatment better, or thrives so splendidly under good care. It does equally well in sun or shade outdoors during summer and presents an imposing appearance indoors during winter. It forms an immense number of graceful drooping fronds, varying in length from two to five feet, which arch over like plumes in every direction, and which are always of a fresh, healthy and beautiful green color.

SCHOLZELI. (*The Plumed Scott Fern*.) The ideal plumed fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all the merits of that most popular variety, but with the pinnae subdivided, giving it an airy feathery appearance. The fronds, like in Scotti, stand erect, with a graceful arch forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed ferns; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow, which is one of the weak points of all its predecessors.

"TEDDY JUNIOR." This magnificent fern has never before been offered for sale by any florist or catalogue firm. It is a sport from the now famous Roosevelt Fern, and, while its habit of growth is to produce a shorter front, it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip, they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread.

THE "ROOSEVELT" FERN. It is our good fortune and great pleasure to offer this wonderful new Fern. In general characteristics it resembles the world-famous Boston Fern, but it produces many more fronds than the Boston, thus making a bushier, handsomer plant. The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other fern; as the plant ages this effect becomes quite distinct.

Nephrolepis Whitmani

WHITMANI. (*The Improved Tarrytown Fern*.) This is an aristocrat among all the *Nephrolepis*, and when well grown is unquestionably the finest of the lot. In this we have unquestionably the most valuable fern of the Ostrich Plume type yet introduced. Not only is it of dwarfer and more compact habit than the *Elegantissima*, but the leaves being more deeply divided, gives the plant a much more graceful appearance, while another important point in favor of the *Whitmanii* is the fact that not a single frond has ever reverted to the common Boston fern.

SCOTTI. It is in essence a condensed form of the Boston Fern with valuable characteristics added, which are not evident in the parent, an average plant in an eight-inch pot having 200 fronds. It has a crispness and hardness about it which is superior to the parent variety, and because of the fact that its character is established in the smallest size, it should find ready sale at all grades.

CLIMBING HELEN GOULD. Warm watermelon-red, same in color as its parent in bush form, which has long been in popular favor. A welcome climber.

CLIMBING QUEEN'S SCARLET. Climbing China. A genuine Queen's Scarlet with a vigorous climbing habit; will make a fine rose for nurserymen. Color velvety-crimson.

DOROTHY PERKINS. Beautiful shell pink color, which holds for a long time, fading finally to a lovely deep rose; very sweet scented; fully equal to Crimson Rambler in foliage, hardiness, habit of growth and blooming qualities.

DR. W. VAN VLEET. Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh pink on the outer surface, deepening to rosy-flesh in the center. The flowers are full and double, of delicate perfume; buds pointed. It very much resembles Souv. de Pres. Carnot in color.

EXCELSA. Intense crimson-scarlet; double flowers in brilliant clusters set in glossy, shining foliage, which never mildews nor spots. An intensified Crimson Rambler, which it promises to displace. Extremely vigorous and the handsomest of all red climbers.

GAINSBOROUGH. Its delicate colors are hard to describe, being delicately tinted flesh, almost white, and lustrous as satin. When in full bloom it resembles a large, fine, white fluffy paeony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter.

JAMES SPRUNT. Deep, cherry red flower, medium size, full and double; fragrant. A strong grower and profuse bloomer; valuable as a climber.

LAMARQUE. A fine climber for greenhouses and conservatories; pale canary yellow, almost white; beautiful buds; large, full flowers, very double and sweet.

MARY WASHINGTON. Flowers medium size, pure white, perfectly double to center; sweet, and borne in endless numbers all summer. Fragrance tinged with old-time musky flavor, so much admired in olden times.

Marechal Niel

MARECHAL NIEL. A beautiful deep sulphur yellow; very full, very large and exceedingly fragrant. It is the finest yellow rose in existence. It has the climbing habit, and where it is permitted to grow until it has attained a large size, as it will in a few years, it yields thousands of beautiful golden yellow flowers. Especially desirable.

MRS. ROBERT PEARY. This is a climbing offspring of that great, hardy white everblooming rose, Kaiserin Augusta Victoria. It is the only white hardy everblooming climbing rose. The flowers are magnificent, extra large, full, deep and double, the buds long and pointed. This superb variety grows to perfection indoors.

PRESIDENT CLEVELAND. (Climbing Marie Guillot.) It is one of the most rapid growing and vigorous Climbing White Roses we have ever seen. The buds are beautiful and fragrance delightful.

REINE MARIE HENRIETTA. A strong, vigorous grower; flowers large, full and of fine form. Color a pure cherry red; large, full and sweet scented. Succeeds well in the South.

RUTH VESTAL. A strong and vigorous grower and true everbloomer. Pure snowwhite buds, and flowers are of the largest size and perfect form. Exceedingly fragrant.

SILVER MOON. Clear silvery-white with a mass of bright yellow stamens; petals of splendid substance and beautifully cupped; exceedingly large and fragrant flowers; growth vigorous and very free blooming. A desirable new climber.

TAUSENDSCHOEN. (Thousand Beauties.) Varying shades from a delicately flushed white to a deep pink or rosy-carmine, in bright clusters of blossoms almost covering the handsome pale green foliage. A vigorous, hardy climber, with few thorns.

W. ALLEN RICHARDSON. The coloring of this rose is simply exquisite. The base and back of the petals are a bright yellow, the center highly colored with glowing copper and rose; first-class climber.

WHITE DOROTHY. A pure white sport from Dorothy Perkins, with which it is identical in foliage and habit. A valuable addition to the hardy climber class.

Experience keeps a dear school, but some will learn in no other way, and scarce in that. Three or five dollars a thousand more for roses is a difference of only one-half a cent or less a plant, still some haggle over price, trusting to luck instead of common sense for quality.
